JLG® VERTICAL LIFTS
Your work varies throughout the day, every day. Electrical installations, painting, plumbing, routine maintenance or ductwork. Whatever is on your checklist.

JLG offers the best choice in vertical lifts and mast booms. From the AccessMaster® push-around vertical lifts to the JLG® Mobile Vertical Lifts that are self-propelled and drivable at full height, JLG has something to meet your needs. The Toucan® mast-style boom lifts provide up and over access for those hard to reach places.

All of the models run on electric power, with no emissions. JLG lifts are built for your needs, and provide you with a safer and more productive alternative to ladders. They feature a narrow chassis to give you access in confined work areas, and longer battery duty cycles for a full day’s work.

Leave the ladder for others. Increase your productivity with best-in-class lift solutions.

**ALL ELECTRIC WITH NARROW CHASSIS**

“With these lifts, I don’t have to worry about downtime.”
GO EVERYWHERE
YOU NEED TO GO
AccessMaster® push-around vertical lifts deliver a whole new level of value and performance. From their portability to their maneuverability, AccessMaster lifts deliver.

The AM series features five models with platform heights from 20 ft to 41 ft, and one 19 ft model that doesn’t require outriggers even at full height. From industrial and maintenance to entertainment and institutional use, the 350 lb platform capacity gives you room to work.

They can be loaded into a standard truck bed or lifted, using the six-inch wide fork pockets and non-marking tires, making them easier to transport. The anodized mast gives you more stability and less deflection and sway. The mast-guide system doesn’t require lubrication for the life of the machine.

Make the AccessMaster your choice for a low-cost solution to overhead work and maintenance applications.

“The AM Series puts me right where I need to work.”
DRIVE YOUR PRODUCTIVITY HIGHER

Whether you’ve got work to do in factories, retail centers, airports or public buildings, JLG® Mobile Vertical Lifts keep you on the job longer. A reliable direct electric drive delivers power while maintenance-free long cycle batteries hold their charge. The built-in, automatic charger has five-hour recharge capability. Three platform options with exclusive one-minute quick-change mountings let you get maintenance jobs done efficiently. And with the most rigid anodized mast in the industry, you’ve got a more stable work platform with less deflection and sway.

“These machines are great for every day facility jobs.”

Ease of Operation and Maneuverability

Head straight for the task at hand with the Point & Go® single joystick control. It operates drive and steer, as well as elevation and descent with variable up and down speeds. From electrical work to hanging signs or general maintenance duties, the zero turning radius lets you maneuver your way into tight areas.

Point & Go® Control System

The JLG Point & Go control system features a single joystick control for smoother drive and lift functions.

Zero Turning Radius

The compact design lets the MVL turn on its own axis, providing greater access to areas where space is limited.
PUT HARD TO REACH WITHIN REACH

With the JLG Toucan® vertical mast lift, you can meet your overhead challenges head-on. Work up, over and around assembly lines, shelving, ductwork or partitions more easily and without interferences. Positioning is easier with a 360-degree rotating mast, up to 32 ft of lift height and over 15 ft of jib reach. With its 500 lb capacity and a long running AC direct electric drive system, the Toucan will help you boost productivity hour by hour, year after year.

Built to Take on Your Facility Challenges

Plant maintenance, retooling and changeovers, warehousing, inspection and remodeling, general contracting — you can count on the Toucan Series to help keep production moving.

As Versatile As Your Needs

With thick rubber non-marking tires for extra cushioning, clean and efficient electric power and 20% gradeability, you’re equipped better than ever to meet your access challenges. Smooth proportional controls, a narrow chassis and greater horizontal outreach are just some of the features that come standard and help you get the job done with greater speed and efficiency.

More Access

Thanks to the compact dimensions and tight turning radius, operators can navigate through confined spaces and access more areas of your facility.

More Capacity

The platform can support two workers and supplies.
Longer Runtime
Efficient electric drive lets you stay on the job longer.

Runs Cleaner
Emission-free, environmentally-friendly electric power.
Choose from our standard 26-inch by 28-inch gull-wing entry platform or an optional narrow 22-inch by 22-inch platform when you need to do work in between ceiling panels. For added platform space on the AMI and MVL models, you can use the 26-inch by 48-inch extension platform, giving you an additional 21 inches of workspace.

When you need to work over seating, machinery or even stairwells, use the straddle extension kit with the available side entry, 26-inch by 26-inch platform for easier entry and exit.

**EXPAND YOUR WORKSPACE**

The optional gull-wing front entry extension platform is available on the AMI and MVL models, giving you an extra 21 inches of platform space. The platform extension retracts for easier storage of your machine.

**SECURITY LOCK**

A programmable four-digit lock provides added security when your lift is unattended.

**TUBE CADDY**

Don’t take the chance of breaking fragile fluorescent tubes. Use the tube caddy to carry them vertically—out of the way of the platform floor so they won’t roll or get under your feet.

**TOOL TRAY**

You won’t need to bend over again and again to reach different tools on the floor of the platform. The factory-approved aluminum tool tray mounts inside the top rail, and is large enough to hold a variety of tools.

---

**CUSTOMIZE YOUR VERTICAL LIFT**

**STRADDLE EXTENSION KIT**

Available for the AM models from 20 ft to 41 ft, the Straddle Extension Kit comes in four pieces, and can be assembled without difficulty.
When it comes to JLG® Ground Support, it’s all about you. Your productivity. Your profitability. Your uptime. From the purchase of your first piece of equipment straight through to the training, parts and maintenance that follows.

- **Customer Service Call Center**
  You can be assured we’ll be giving an all-out effort to support you. Just think of us as your personal on-call, full-service support team. We make it happen. Period.

- **Financial Solutions**
  Maximizing your profits. Preserving your cash flow. Let our financing specialists help choose the program designed specifically for your needs.

- **Aftermarket Parts**
  Keep your equipment running at peak performance with genuine replacement parts, accessories, attachments, rebuilt and competitive parts all from one source — JLG.

- **Training**
  Knowing your equipment inside and out results in higher productivity on the job. Our instructor-led courses give you the hands-on time you need for success.

- **Service Centers**
  Your needs. Your uptime. JLG is on the job to fulfill your every need, from repair, reconditioning, same-day parts and much more. We’re here to support you.
